UCRL Trans-446

Trans. of *Zhurnal Eksperimental'noy Teoreticheskoy Fiziki* (USSR) 1958, v. 35, no. 1(7), p. 184-202.

The system of equations for the radial functions describing the movement of the alpha-particles that fly out in the alpha-decay of nonspherical nuclei with an arbitrary spin was examined. Equations were obtained for (1) determining the boundary conditions for the radial functions on the surface of nuclei and (2) expressing the probability of alpha-decay through values of the radial functions on the nucleus and the shape of the nucleus. A simple approximation was obtained, defining the dependence of the probability of (Physics--Theoretical, TT, v. 5, no. 6) (over)
